

## Ponds and Irrigation Committee

### Regency at Providence

#### Minutes of September 4, 2019 meeting

The meeting came to order at 9:03AM. Present were committee members Linda Kulp, Bruce Sieving, Kurt TeKolste and Board liaison Karen Windau.

We discussed the draft budget proposed by the committee chairman and approved a few adjustments. The budget will undergo a final review before being submitted to the Board.

The following activities by contractors since our last meeting were noted:

- The broken sprinkler head near the RH clubhouse was repaired by hydroscapes
- Rain Maker installed pressure regulators around the three guardhouses. The pressure was adjusted by Bruce.
- No additional turtles have been found in the traps since two were removed earlier in the summer.
- The bubble aerator has been installed in Pond 2 and is working well.
- The well discharge into Pond 2 has been fixed so that the water is carried to the pond in a pipe
- The leakage around the Pond 2 pump has not been repaired. A contract has been negotiated with Robert Keyes for this work but follow up is needed.

**ACTION (Kurt)** Bruce noted that turning the irrigation on or off at the Sloan clubhouse is complex, involving as it does the well next to the phase I pond. He would like for admin to request a call from Hydroscapes so that the committee can observe the process.
